PROFESSIONAL PROFILE

Web Developer with over 11 years of experience in designing and developing tailor-made digital solutions. Expert in **front-end development**, with advanced skills in creating **responsive**, high-performing websites optimized for an intuitive and high-quality user experience (UX/UI). **Proactive problem solver** with a results-oriented mindset, able to work effectively both independently and within multidisciplinary teams. Passionate about technological innovation and consistently updated on **best practices** and the latest web development trends to provide modern and scalable solutions.

COMPETENZE TECNICHE

Core Languages

- **HTML5**: Semantic structuring of web pages. Essential for accessibility and SEO.

- **CSS3**: Creation of modern, responsive layouts using advanced techniques (Flexbox, Grid).

- **JavaScript (ES6+)**: Core for interactivity and dynamism, including concepts like Promises, async/await, DOM manipulation, modules, and arrow functions.

Frameworks and Libraries

- **React.js** (basic) / **Next.js** (basic): Development of modular components, focusing on Single Page Applications (SPA) and Server-Side Rendering (SSR).

- **Bootstrap** / **Tailwind CSS**(basic): CSS frameworks to speed up the development of responsive layouts.

Build & Automation Tools

- **Gulp**: Automation of tasks such as minification, concatenation, and optimization.

- **npm**: Package manager for integrating libraries and dependencies.

Version Control and Collaboration

- **Git** / **GitHub** / **Bitbucket**: Source code management, branch creation, and team collaboration.

- **Jira**: Task management for teams.

Performance & Optimization

- **Responsive Design**: Techniques to ensure compatibility with mobile devices (media queries).

- **SEO Tecnico**: Semantic structure, speed, and optimized metadata.

CMS & Tools

- **WordPress** - Development of custom themes.
- **Google Analytics** - Monitoring visits and events.
- **Customer.io** / **Hubspot** - Email marketing.

APIs and Data Communication

- **REST APIs**: Interaction with backend services via HTTP requests.

- **JSON** / **AJAX**: Format for transferring data and dynamic updates without reloading the page.

Backend Development

- **Symfony** (basic) - Framework for large-scale applications.
- **MySQL** (basic) - Creation and optimization of relational databases.

Design & Prototyping

- **Photoshop** / **Illustrator** / **Figma** (basic)
